Re: DA-2016/1810 – Statement of Environmental Effects

To Whom It May Concern,

Port Kembla Football Club (PKFC) have DA approval to install two seating stands (North East & South East) and to install four (4) new lighting towers at Wetherall Park Primbee.

The position of the new lighting towers in DA-2016/1810 was to have them installed in the four corners of the playing field.

The new light towers will mount LED Lights and comply with Australian Standard - AS 2560.2.3-2007 (Sports lighting, Part 2.3: Specific applications - Lighting for football (all codes)).

PKFC have been successful in obtaining a grant as part of the Port Kembla Community Investment Fund Round 4, which does not cover the full installation cost of the light towers.

In re-evaluating the possible positions of the light towers; it has been determined that by having them situated in positions less than 5m from the existing light towers, costs will be reduced sufficiently to enable the funding from the grant to complete the project.

The existing halogen lighting towers do not pose and unacceptable environmental effect to the local residents in the area; and the LED lighting towers will actually reduce the environmental impact further.

Yours sincerely

Sean Till

Secretary
