With reference to Strategy 5.1 of the Illawarra Shoalhaven Regional Plan that is currently on exhibition, I urge Kiama Council and the Implementation team to commit to retaining and expanding green spaces within the residential precinct of Kiama Heights. Quite simply, if this is not retained then it is lost forever and having only one other park in this area does not met the Plan's objectives; environmental needs or community needs.

It is crucial that the community land situated at 85 Attunga Avenue, Kiama Heights retains this zoning to not only meet the objective of the Regional Plan but to also provide for future generations. Improved road systems has enhanced access to this suburb which has made it attractive for new and young families to move to the area.

Any future or proposed residential expansion nearby that includes parkland will be hampered by South Kiama Drive which divides the eastern side, being the headland of Kiama Heights, from any western development or potentially any southern expansion beyond Loves Bay. Whilst such development is welcomed progress, it should only be considered as additional parkland to what is already designated at 85 Attunga Ave Kiama Heights.

How did you hear about this?

Communicated by Local Council as part of a minuted meeting on the proposed rezoning of existing parkland

I agree to the above statement Yes
