I support it

**Submission**

I have an opportunity to read the "Draft Camellia-Rosehill Place Strategy". I am impressed with the overall proposal and that there is a long-term strategy in place.

I am impressed with the commitment to open spaces and the Active Transport options.

As someone engaged in the exercise/health sector I see these as important for long-term benefits to the population for staying well and healthy. The design of the Active Transport options also provide realistic options for people to travel between the Parramatta and Sydney Olympic Park precincts.

Congratulations on your foresight and future vision for this area.
