This redevelopment is a unique opportunity to give back to the community, build for the people and the planet.

The sustainability targets should be clearly stated to incorporate the objectives on Climate & Energy, Circular Economy, Water & Biodiversity, and Social & Communities.

The public spaces should prevail over the buildings, the parks should be made larger, the light over the public spaces made a priority, the foreshore walk should be on land rather than on the water. Also, there should be more dwellings for public housing, ensuring diversity and access to this precinct to all.
