The proposed development doesn't support the claimed objectives, nor reflecting the actual cost effectiveness of this development.

While if this investment reallocated to another part of Sydney where the long-term population growth would be more accommodating and resilient.

Given the nature of the area where the development proposed, there is a high concern in relation to the demographic growth compared to the infrastructure in place and availability of the public services, besides number of environmental concerns.

Besides I'm really concern about the level of air and noise pollution for the future residents of this development will be exposed to considering the main distributor traffics.

Thank you.
