The recent amendments are welcome, but tokenistic. The proposal is still inadequate in providing no accommodation for essential workers, and only a vestigial Indigenous presence. One tower has been reduced - by adding apartments to another block, retaining the over-development. The proposal blocks view of Pymont and from Pymont towards Glebe. The open space is fragmented and unfit for most recreational purposes.

This is not a revised proposal, it is merely a minor modification.

Please try harder and be professional.
