

Integration APIs

Release Notes

March 2025

Overview

As part of the Department's commitment to improving the ePlanning Digital Services on the NSW Planning Portal, we regularly deploy fixes where required and introduce minor enhancements to APIs to support policy changes. These deployments occur on a monthly schedule and are backward compatible, meaning that code changes are not required at the stakeholder end.

This month's release note captures all fixes and enhancements that have been deployed under each digital service API. Some items may require configuration changes on the part of the stakeholders – see table below.

Please note that this document is designed to support the technical staff responsible for the maintenance of stakeholder APIs. It ensures that the integration between the ePlanning Portal and stakeholder IT systems continues to improve.

If you have any questions about the below updates, please contact us at ePlanningAPI@planning.nsw.gov.au.

Online DA Service APIs

Please note, these APIs operate between NSW Planning Portal and Councils/CADNSW

Jira Ticket Ref	API version	Data Flow	Operations	Description	Action
INCAPI-4049	DA V2	ePlanning to Councils	CreateDA	The 'isIntegratedDevelopment' field has been fixed to display the correct value instead of showing undefined.	No action required.

Integration APIs

Release Notes

March 2025

Online Post-consent Certificate Service APIs

Please note, these APIs operate between NSW Planning Portal and IT systems of Certifiers (Private and Council)

Jira Ticket Ref	API version	Data flow	Operation	Description	Action(s)
ICA-650	PCC V1	Certifiers to ePlanning	MissedInspection API	<p>In the Post-Consent Certificate service, the declaration 'I confirm the work that would have been the subject of the missed inspection is satisfactory.' is automatically selected on the Missed Inspection screen if the user utilizes the MissedInspection API.</p> <p>The API will also support this functionality when the declaration value is explicitly provided.</p>	No Action Required.

Online Certificate Registration API

Please note, these APIs only operate between NSW Planning Portal and IT systems of relevant certifiers / Councils

Jira Ticket Ref	API version	Data flow	Operation	Description	Action(s)
ICA-481	CR V1	ePlanning to Council	Reference data API	The reference values for the certificate type for the outbound are displayed appropriately in the reference data list inline with the payload.	No Action Required

Integration APIs

Release Notes

March 2025

Common APIs (Program-level enhancements that impact the common operations utilised by several service APIs)

Please note, these APIs operate between NSW Planning Portal and IT systems of Private Certifiers and the relevant Council.

There are two versions currently supported by the Department (Common V1 and Common V2), however, Common V1 is reserved for consolidating the administrative functions (e.g. Document exchange, Reassign and Withdraw) that were previously repeated across multiple digital services.

Jira Ticket Ref	API version	Data Flow	Operations	Description	Action
ICA-594	Common V2	ePlanning to Council	NotificationofNODStatus	For some DAs, the 'condition text' was appearing blank when generating conditions. This issue has been resolved to ensure the condition text is displayed correctly.	No Action Required.
ICA-633	Common V2	External to ePlanning	Getcaseinfosync	The time format for the startWorkingHours and endWorkingHours fields in the proposed24HrWork object for the DA case has been updated to align with the time format used in Create DA.	No Action Required.
