## CONSTRUCTION SPECIFICATIONS

All design and construction must comply with the Building Code of Australia (BCA) 2007, Australian Standards occupational Health & Safety, Disabled Discrimination Act, and all local Government Australia.

## SPECIFICATIONS

**ELECTRICAL**  
These drawings to meet in conjunction with the Electrical Consultants Details. Lighting is limited to high efficiency lighting in accordance with the BCA 2008 classes F4.4 and A5.1683-1686. The hot water system is to comply with the BCA 2008 para 5.7.

## HYDRAULIC FLUIDS

Three drawings to be used in conjunction with the hydraulic constraints outline. Existing structural concrete slabs reviewed & penetrations approved by structural engineer prior to implementation. Piers are to be formed with a leveling compound or tamped to a certain even surface and finished with a waterproofing membrane which is tamped up to maintain 100mm from top of wall piers. The finish floor finish is to be covered with a 20mm silica coating throughout all wall to floor piers and joints. Oilwater and food impregnation sealer from market is applied to floor finish and wall piers. Oilwater and food impregnation sealer from market is applied and changed to a floor finish (sucker paint) and covered to stone. All floor penetrations to be fully sealed and waterproofed and satisfy the stippled if necessary.

## WALLS

Wall surfaces & demoflexions are noted as oval finished dimensions. Kitchen and food preparation areas walls to be be solid filled and finished in a light color with gasket tiles, stainless steel, plastics or similar approved material adhered directly to the wall, to provide a smooth impervious surface. to a minimum height of 2100mm AFFL

## CHALLENGE

Suspended ceilings are to be rigid, smooth faced non-absorbent material and finished to surround even surface, and painted with a washable light color paint. Preferably use plasterboard.

## EQUIPMENT

The Client and shop floor to verify all equipment specifications. All equipment is to be supported on 100mm legs or 75mm casters, brackets or approved metal framework. All refrigeration, condensing and other cooling appliances and built-inware and all food storage and display equipment, is to have an accurately numerically scaled thermometer, which is displayed for easy viewing.

**JOINERS**

All surfaces of rubber primary to terminated, all supports and shims to be supplied on 160mm legs, 75mm plates, or 75mm casters, or approved metal framework. Handles to be 200mm T-shaped mounted as indicated, all lugs to be heavy duty stainless steel type. All crawler lugs to comply with BCA and DDA code.

## REFRIGERATED CHAMBERS, STRONGROOMS AND VAULTS

A refrigerated chamber, strong room or vault which is of sufficient size for a person to enter must have:  
- a doorway which is capable of being opened by hand from the inside without a key  
- thermal light contributed by a switch adjacent to the entrance doorway, yields the chamber, strong room or vault.  
- an indicator lamp positioned outside the chamber, which is illuminated when the thermal light is required by a switch on an alarm signalling board outside but controllable only within the chamber able to achieve a sound level of 80 dB (3 m).
