Hi Paul,

The hydros looking after your request have accessed previous advice we gave, and their current work is close to complete. I expect to see it either by COB or early next week, so you can expect our response next week.

For future requests, we would like you and your colleagues who may send similar requests to use our Water Assessment Management System (WAMS). This helps our workload management and make requests visible to all in the Groundwater Team members (so no issue with people on leave).

The link to access it is <https://wams.water.nsw.gov.au/WAMS/Portal.aspx>

You will need to ask for access/password. Since you are within DPE there may be an option for your credential be the same as your network access once you have been registered, the people who will give you access can inform you on that.

Once in the portal, go to the water catalog then Groundwater then General Enquiries and Support.

Feel welcome to send an email to me to alert me, follow up or discuss something, that is no problem at all and is how we work with other "client" agencies.

Best regards

Subject: North Tuncurry Urban Release Area - agency consultation post-exhibition

Hi [REDACTED],

Further to our request to our request for assistance with Groundwater Modelling for North Tuncurry Urban Release Area, I note that the proposal was sent to DPE Water on two other occasions to gauge of the proposal was adequate for exhibition (see previous advice attached). Exhibition documents can be found [here](#). Please note it is the Department's intention to finalise the State-led rezoning by end of 2022.

- North Tuncurry URA – 27 May 2020 - V15/2812-4#
- North Tuncurry URA – 19 July 2021 - 15/2812-4#

I refer the proposal to NSW Water Group to provide the opportunity for your team to provide comment further to that already received as listed below should they require. The most recent advice (19 July 2021) predates the Addendum report on the Integrated Water Cycle Management Strategy (October 2021). However, your most recent comments relate to water licensing and detailed design which would occur after rezoning.

Any written comment in response to the public exhibition of the proposed rezoning is required in 21 days from this email (**due 29 September 2022**).

If you would like to discuss any of these matters, please do not hesitate to contact me on the number below.

Regards

Paul Maher
