

Integration APIs

Release Notes

October 2023

Overview

As part of the Department's commitment to improving the ePlanning Digital Services on the NSW Planning Portal, we regularly deploy fixes where required and introduce minor enhancements to APIs to support policy changes. These deployments occur on a monthly schedule and are backward compatible, meaning that code changes are not required at the stakeholder end.

This month's release note captures all fixes and enhancements that have been deployed under each digital service API. Some items may require configuration changes on the part of the stakeholders – see table below.

Please note that this document is designed to support the technical staff responsible for the maintenance of stakeholder APIs. It ensures that the integration between the ePlanning Portal and stakeholder IT systems continues to improve.

If you have any questions about the below updates, please contact us at ePlanningAPI@planning.nsw.gov.au.

Online DA Service APIs

Please note, these APIs operate between NSW Planning Portal and Councils/CADNSW

Jira Ticket Ref	API version	Data flow	Operation	Description	Action(s)
INCAPI-3666 & INCAPI-3667	DA V2	Council to ePlanning	Determine	4.6 Variation changes: Development Standard Variation details are currently optional when the consent authority approves the development standards. Per regulatory requirements it is required to be supplied when applicable.	Councils using the DA service are to review and ensure to send the development standard variations details when it is required.

Release Notes

October 2023

				<p>1. In line with the Regulatory Compliance requirements, the following attributes would be required to be supplied.</p> <p>'Name of the clause to be varied' (API Attribute Name: developmentStandard) and the 'brief justification for the variation' (API Attribute name : briefVariationJustification) within the developmentVariationDetails object.</p> <p>2. The "concurring authority for the approved variation" attribute will be defaulted to the value 'Council' for DA.</p> <p>3. A new attribute 'devStandardVariationApproved' is introduced to enable the customers to provide 'NA' value in line with the ePlanning portal question 'Was a variation to development standards approved'. This is in place of the existing attribute isDevStandardVariationApproved . Either one of the attributes to be supplied for successful determination. Backward compatibility for the old attribute will be continued to be supported.</p> <p>New determining authority value added :</p> <p>1. A new value 'Council staff under delegated authority' for the determining authority is added in the determination screen.</p>	
HAC-89	DA V2	ePlanning to Council	CreateDA/UpdateDA	<p>SBSEPP changes:</p> <p>In line with the ePlanning portal changes, new attribute 'recycledMaterialsUsedDetails' is added to</p>	Councils using the DA service are to review and consider

October 2023

				capture information about the use of recycled materials in the development for DA	adopting this enhancement when it is relevant to them.
HAC-92	DA V2	Council to ePlanning	EditDA	SBSEPP changes: In line with ePlanning portal's SBSEPP changes, New attribute 'recycledMaterialsUsedDetails' added to capture information about the use of recycled materials in the development for DA which can be edited through this operation.	Councils using the DA service are to review and consider adopting this enhancement when it is relevant to them.

State DA Service APIs

Please note, these APIs operate between NSW Planning Portal and agency.

There is only one version currently supported by the Department (state DA V1)

Jira Ticket Ref	API version	Data flow	Operation	Description	Action(s)
INCAPI-3668 & INCAPI-3669	StateDA V1	Agency to ePlanning	Determine	4.6 Variation changes: Development Standard Variation details are currently optional when the consent authority approves the development standards. Per regulatory requirements it is required to be supplied when applicable.	Agencies using the StateDA service are to review and ensure to send the development standard variations details when it is required.

October 2023

				<p>1. Inline with the Regulatory Compliance requirements, the following attributes would be required to be supplied.</p> <p>‘Name of the clause to be varied’ (API Attribute Name: developmentStandardVaried) and the ‘brief justification for the variation’ (API Attribute name: briefVariationJustification) within the developmentVariationDetails object.</p> <p>2. The “concurring authority for the approved variation” attribute will be defaulted to the name of the state agency.</p>	
HAC-2	StateDA V1	ePlanning to Agency	CreateStateDA/UpdateStateDA	<p>SBSEPP changes:</p> <p>In line with the ePlanning portal changes, new attribute ‘ recycledMaterialsUsedDetails’ is added to capture information about the use of recycled materials in the development for State DA</p>	<p>Agencies using the StateDA APIs are to review and consider adopting this enhancement when it is relevant to them.</p>

Integration APIs

Release Notes

October 2023

Online Complying Development Certificate APIs

Please note, these APIs operate between NSW Planning Portal and IT systems of Certifiers (Private and Council).

Jira Ticket Ref	API version	Data flow	Operation	Description	Action(s)
INCAPI-3427	CDC V1	ePlanning to Certifier	CreateCDC/UpdateCDC	In line with the ePlanning portal changes, new attributes are added to capture the builder or principal contractor details.	Certifiers using the CDC APIs are to review and consider adopting this enhancement when it is relevant to them.

Online Post-consent Certificate Service APIs

Please note, these APIs operate between NSW Planning Portal and IT systems of Certifiers (Private and Council)/CADNSW

Jira Ticket Ref	API version	Data flow	Operation	Description	Action(s)
AP-63	ePlanning to Certifier	PCC V1	CreatePCC/UpdatePCC	Housing and Productivity Contribution (formerly known as ICDP) In line with the ePlanning portal changes, new attribute is added to capture what stages of development the related CC, OC, SC or SWC is being sought.	Certifiers using the PCC APIs are to review and consider adopting this enhancement when it is relevant to them.

Integration APIs

Release Notes

October 2023

AP-70	Certifier to ePlanning	PCC V1	Determine	Housing and Productivity Contribution (formerly known as ICDP) New attribute added to capture what stages of development the related CC, OC, SC or SWC is being sought. This is applicable when Housing and Productivity contributions have been identified. If the information was not provided by the applicant during submission, the certifier must input this information.	Certifiers using the PCC APIs are to review and consider adopting this enhancement when it is relevant to them.

Common APIs (Program-level enhancements that impact the common operations utilised by several service APIs)

Please note, these APIs operate between NSW Planning Portal and IT systems of Private Certifiers and the relevant Council.

There are two versions currently supported by the Department (Common V1 and Common V2), however, Common V1 is reserved for consolidating the administrative functions (e.g. Document exchange, Reassign and Withdraw) that were previously repeated across multiple digital services.

Jira Ticket Ref	API version	Data flow	Operation	Description	Action(s)
INCAPI-3693	Common V1	External to ePlanning	getCaseinfoSync	An additional attribute known as 'currentStage' is introduced in the response of the getCaseInfoSync. This indicates the name of the workflow stage that the case is currently at.	Councils/Agencies/Certifiers using the common APIs are to review and consider adopting this enhancement when it is relevant to them.
