

Regionally Significant Development

Faster investment to help Build Back Better

Regionally Significant Development brings **crucial investment** that boosts growth

>**\$1.5bn** invested in metro councils and >**\$450m** in regionals in the first half of 2021

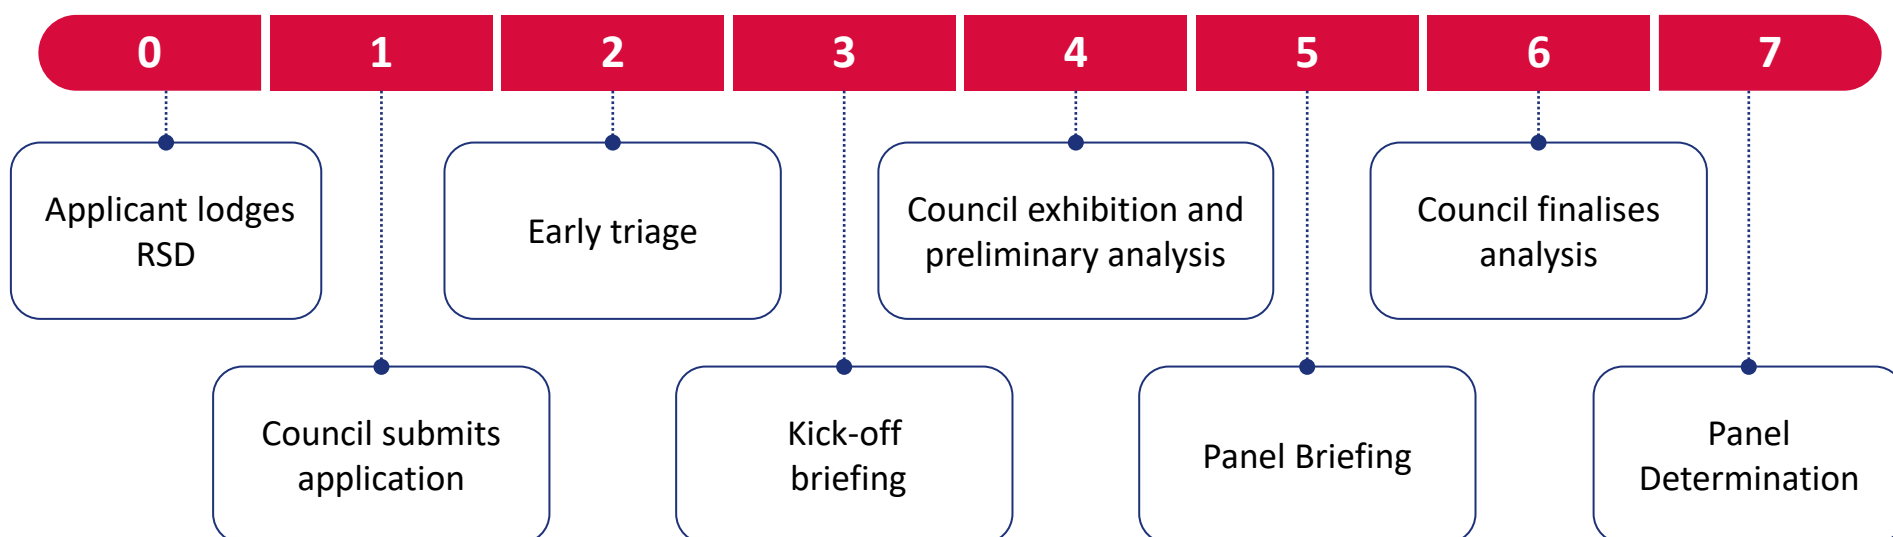

Our pilot program tests new ways to **streamline the assessment process** and provide this economic boost faster

We believe the new approach will make a difference by bringing partners together earlier and introducing standard briefing practices

Our new process is based on feedback from the whole system: 7 simple steps for each application

The pilot began in July in 13 councils across New South Wales
