

Entire site identified by C&R
as Potential Offset Area

Legend

- Investigation site boundary (source: LPI)
- Watercourse (source: LPI)
- 10m EEC buffer
- Contour 1m (source: LiDAR)
- Firetrails
- Potential biodiversity offset area
- Slope 18-20 degrees
- Slope exceeding 20 degrees
- Sydney Metro Area Vegetation (v3 2016 (VISID_4489))
- Endangered ecological community (EEC)
- Potential Offset Area (C&R)

Disclaimer: The mapping is indicative of available space and location of features which may prove critical in assessing the viability of the proposed works. Mapping has been produced on a map base with an inherent level of inaccuracy, the location of all mapped features are to be confirmed by a registered surveyor.

PROJECT & MXD REFERENCE
Cnr Forest Way and Madang Road,
Belrose
