

Integration APIs

Release Notes

March 2024

Overview

As part of the Department's commitment to improving the ePlanning Digital Services on the NSW Planning Portal, we regularly deploy fixes where required and introduce minor enhancements to APIs to support policy changes. These deployments occur on a monthly schedule and are backward compatible, meaning that code changes are not required at the stakeholder end.

This month's release note captures all fixes and enhancements that have been deployed under each digital service API. Some items may require configuration changes on the part of the stakeholders – see table below.

Please note that this document is designed to support the technical staff responsible for the maintenance of stakeholder APIs. It ensures that the integration between the ePlanning Portal and stakeholder IT systems continues to improve.

If you have any questions about the below updates, please contact us at ePlanningAPI@planning.nsw.gov.au.

Online DA Service APIs

Please note, these APIs operate between NSW Planning Portal and Councils/CADNSW

Jira Ticket Ref	API version	Data flow	Operation	Description	Action(s)
ICA-79	DA V2	Council to ePlanning	AcceptReturn, FinalAssessment, Determine, ReviewRequestConsent, EditDA, RequestAdditionalInfo	Exceptions related to document retrieval failures have been addressed to show appropriate API error messages.	Councils using the DA APIs are to review and consider adopting this enhancement when it is relevant to them.

Integration APIs

Release Notes

March 2024

INCAPI-3409	DA V2	Council to ePlanning	Multiple operations	Fix has been given to ensure that all applicable documents are passed under the delta document section for relevant update transactions.	No API code changes required.
-------------	-------	----------------------	---------------------	--	-------------------------------

Certificate Registration APIs

Please note, these APIs operate between NSW Planning Portal and IT systems of Certifiers

Jira Ticket Ref	API version	Data flow	Operation	Description	Action(s)
ICA-82	CR V1	Certifier to ePlanning	CreateCRCCase	Exceptions related to document retrieval failures have been addressed to show appropriate API error messages.	No API code changes required.
ICA-61	CR V1	ePlanning to Council	CreateCR	API Code changes are done to change the value in the outbound payload to read 'otherName' instead of 'otherGivenName'	Councils using the CR APIs are to review and consider adopting this enhancement when it is relevant to them.

Release Notes

March 2024

Online Post-consent Certificate Service APIs

Please note, these APIs operate between NSW Planning Portal and IT systems of Certifiers (Private and Council)

Jira Ticket Ref	API version	Data flow	Operation	Description	Action(s)
ICA-81	PCC V1	Certifier to ePlanning	AcceptReturn, AssessmentReportDireSafetyIssue, PerformInspection, MissedInspection, CompleteInspection, Determine, NotifyCriticalStageInspection.	Exceptions related to document retrieval failures have been addressed to show appropriate API error messages.	Certifiers using the PCC APIs are to review and consider adopting this enhancement when it is relevant to them
INCAPI-3742	PCC V1	ePlanning to Certifier	CreatePCC/UpdatePCC	<p>Inline with ePlanning portal changes during the submission of construction certificate, API descriptions are also amended. Please note, the below corresponds to the portal UI changes.</p> <p>Existing label: Capital Investment Value (CIV)</p> <p>New label: Estimated Development Cost</p> <p>Existing label: Please provide the estimated cost of development? Note: Please state the full contract price inclusive of GST?</p>	Certifiers using the PCC APIs are to review and consider adopting this enhancement when it is relevant to them

Integration APIs

Release Notes

March 2024

				New label: Please provide the estimated development cost including GST?	
INCAPI-3052	PCC V1	Inbound	All operations	Currently actions on the case can be done only by case owner. This is being liberalised so that any valid user from the same organisation can progress the case without reassigning.	No action required.
INCAPI-3748	PCC V1	Certifier to ePlanning	IssueBASIXCompletionReceipt	In line with the ePlanning portal changes, a new attribute 'issuanceDate' is added to the API to capture the BASIX certificate's issuance date.	Certifiers using the PCC APIs are to review and consider adopting this enhancement when it is relevant to them
INCAPI-3290/CONAPI-852 & CONAPI-788 , CONAPI-915	PCC V1	Certifier to ePlanning	Determine	Currently, if the document file name is more than 64 characters, system couldn't handle and was throwing internal server error. Now the issue has been fixed to support more than 64 characters.	No action required.

Online CDC Service APIs

Please note, these APIs operate between NSW Planning Portal and IT systems of Certifiers (Private and Council).

Jira Ticket Ref	API version	Data flow	Operation	Description	Action(s)
ICA-80	CDC V1	Certifier to ePlanning	AcceptDecline, Determination & FinalPlan submission	Exceptions related to document retrieval failures have been addressed to show appropriate API error messages.	Certifiers using the CDC APIs are to review and consider adopting this enhancement when it is relevant to them
ICA-72	CDC V1	Certifier to ePlanning	Determination	The system is currently throwing internal server error message due to the determination date being before acceptance date. This issue has been fixed.	No action required.
ICA-48	CDC V1	Certifier to ePlanning	ProvideDevSpec	Currently, provideDevSpec operation contain Unicode characters for some of the values for the below attributes. 1.frameMaterials 2.roofMaterials 3.wallMaterials To make it convenient for API consumers, Unicode special character is changed to use standard hyphen character.	Certifiers using the CDC APIs are to review and consider adopting this enhancement when it is relevant to them
