Submission

I would strongly object to the proposal for the following reasons:

Lack of infrastructure to support the existing community in Schofields: Based on feedback in community, there is already a struggle for infrastructure like car parking spaces near station, medical facilities, child care facility, parks, gardens and so on. Addition of new housing will put stress on already limited facilities.

Lack of clarity on community roadmap: There seems to be a growing sense within the community that there is an absence of a community roadmap of what is the plan for Schofields. It looks like Schofields will end up being a poster child of unplanned development and urban sprawl.

Lack of schools: There is severe shortage of schools in Schofields neighbourhood. And the

new housing proposal would aggravate the existing shortage.

Lack of hospital: There is no hospital in the Schofields area. In the absence of the hospital, a new development looks like the priority of the council is misplaced.

Lack of green spaces: There is a severe shortage of green spaces in and around Schofields and it doesn't look like the government is interested in ensuring the same.

Lack of community spaces: There are no community spaces like library, swimming pool within Schofields and it doesn't appear in any of the council or government roadmaps.

Existing development: There are already existing developments happening in Schofields which makes the community feel that their voice is not being heard. It looks like the planning process just wants to go through the motions of listening to the community, without working constructively on their feedback.

Our community does not need this development, and its additional population - nor can the current infrastructure / services in our community support it.

Our town centre is still awaiting much needed development to support our current community - let alone additional support for this increased population.

Schools are full and cannot support additional children this large development would bring.

Roads are already congested with the current population, and would be significantly worse with this development.

The location does not support a high rise of this scale - the roads in and out would be congested at all times with this number of people coming and going.

The location does also not support the parking for this scale - again leading to congestion.

This development is detrimental to our community and only benefits the property developers.

1. The Railway terrace / Burdekin road is narrow and already congested.. 1700+ units including social housing at this location will increase traffic manifold and aggravate the already increasing traffic problem
2. The area do not have parks and other recreational amenities to cater such additional population
3. The lands around railway terrace should be converted to parks or single villa units to reduce traffic pressure on the railway terrace/ budekin road and other amenities.
4. Chances of increase in crime rates in the area due to this additional high density population

Our schofields and Tallawong area have been facing congestion problem, lack of parking spot and school overcrowded.

I strongly disagreed that more affordable house or apartment to be built in above area.

First, most weekday, especially about 8am. We are not able to find parking spot because it is all full. It has a great impact on our travel time to work. Secondly , there always a long congestion near Windsor road and Schofields during 8:30 and and 6 pm. Lastly, Schofield and the ponds area being one of the biggest school in NSW has more than 2000 students in just one school. I ll be concerned the safety for the children in our local area. Affordable house or appartments can be a trigger of crime increase. It can attract drug dealers and patients with emotional disorder those who are not capable to work to settle in those area. It definitely raises a concern on children's safety and health environment especially Schofields is one of area most children residing in Sydney.

Our family strongly oppose this proposal as there has been many apartments already built near Schofields station (at the end of Pelican road, on Schofields Road and Tallawong metro station). There has been a heavy traffic already on Schofields and surrounding roads and Additional 1800 dwellings will increase the traffic congestion further. Currently from my house to Tallawong metro station it takes around 25 minutes in morning to go due to traffic which is only 5 minutes drive.

There are not enough parks, schools, parking facility built in Schofields and surrounded area but it's sad that council is proposing additional dwellings that will create more congestion in the vicinity. I'm really saddened that Schofields is being transformed like a concrete jungle. I kindly request not to create more traffic congestion and scarcity of public amenities shared by more people in community where current community is already struggling to get those.

Submission

I object to it because the areas around are already crowded with existing upcoming houses. There is a lot of traffic already. There is not enough infrastructure to support more houses. The train station car parks get full by 7:30am or sometimes even before that. And it will get worse when all the current vacant lands get occupied. In nirimba fields, there is no public transport at all so we rely on the car for the transport. What north west needs are some natural reserves or parklands.

There's already too many apartments in the area and less trees.

There is a capacity constraint on the infrastructure. The roads , town center parking , frequency of trains, buses is not big enough to support this growth.

We should preserve greenery and trees instead of making it a concrete jungle.

This will impact our after life style in our suburb.

It's evident that other localities having such facilities are facing huge crime issues which is even not able to controlled by officials.

So we would like a place to live safe and calm without any crime options.

We need a safer place for our young generation.

That's why we invested to settle near to Schofields.

Please support us to live calm and in a crime free zone.

Thanks.

Tallawong

Please provide your view on the project

I object to it

Submission

As a resident of Tallawong, I strongly feel that the area needs a lot more development of infrastructure and amenities (station parking and playgrounds for kids for example) before adding yet another 1000+ dwellings to an already crowded area. The more we add affordable housing before necessary amenities, the more Tallawong is becoming more of a low socioeconomic, undesirable place to live rather than the family friendly clean suburb that everyone wants.

I object to this development because of the existing traffic density and the potential increase in the traffic density once this development is completed.

Railways Terrace is already experiencing huge traffic bottle neck due to the below reasons.

1. 3 traffic signals in a span of 300 mtrs near the station.
2. The only shopping centre in the vicinity.
3. The only access road towards rousehill, ponds, sunny Holt road, quakershill areas.
4. Already existing apartment complexes.

I have a reason to believe that this new development will make the traffic density worst if other infrastructure is not developed for distributing the traffic on alternate routes.

Railway Terrace road is a growing hub with the Station, Shopping village and increasing number of apartments. The road is already narrow. This plan will affect the access for residents coming in from Nirimba Fields who right now have only a single approach to Railway Terrace Road. The work on Burdekin Road Extension, and Nirimba Fields access to Quakers Hill via the Siding Terrace should either be part of the plan or completed before this to ease traffic congestion in the area. Otherwise this will turn into a nightmare notwithstanding traffic coming in from Marsden Park, Riverstone and other surrounding areas.

Schofields - 2762

Please provide your view on the project

I object to it

Submission

We strongly oppose this proposal as there has been many apartments already built near Schofields station (at the end of Pelican road). This is a significant deviation to the original Alex Avenue Precinct and DCP (released in April 2010). There is heavy traffic already in Schofields roads and additional 1800 dwellings will hugely increase the traffic congestion further! This will significantly impact the quality of the life of the Schofields residents as

- It would take longer time to travel to even the essential key destinations such as local supermarkets and medical centres in the vicinity let alone schools, offices and bus/train stations
- Public places like stations, grounds and parks will be overcrowded which could lead to anti-social behaviour.
- Lack of schools is already an immense problem. For example, Riverbank Public School is bursting at its seams being the largest (overcrowded) school in NSW. Bless the Principal and teachers for holding it together! Building all these new apartments would lead to kids

being cramped into small space creating unhealthy learning environment (lack of educational resources and infrastructure) further fuelling anti-social behaviour. Such a large number of affordable housing would significantly change the demography of the Schofields neighbourhood. It has been repeatedly proven that concentrating the affordable housing in an area would increase the crime rates and anti-social behaviour of the area. When renters are concentrated in an area, they don't care or contribute to culture, cleanliness and aesthetic appeal of the neighbourhood. This would affect the peaceful living of the current residents. This precinct would be unsafe environment to women and kids, especially to travel in off peak hours or nighttime. As per the last ABS statistics (2021), Schofields had around 4991 households with median household income of \$140,000. Adding proposed 600 affordable housing would add significant portion of renters with lower income in the neighbourhood. This would significantly affect the areas mentioned above.

In addition, these high-density residencies will be in close proximity (about 4km) to the apartments currently being built near the Tallawong station. We are all yet to experience the impact of those Tallawong station apartments and these additional high-density residencies will no doubt throw spanner in the works.

I'm shocked that the council is proposing additional dwellings and large number of affordable housing that will create more congestion in the vicinity. I'm really saddened that Schofields residents are being treated so poorly! Don't make Schofields residents victims of the previous governments' poor housing policies and lack of adequate affordable housing. It's a burden that must be borne by ALL RESIDENTS of NSW. It shouldn't be DUMPED IN A FEW SUBURBS. WE STRONGLY REQUEST TO ABOLISH THIS PROPOSAL on both high-density residencies and large number of affordable housing.

Suburb needs lot of infrastructure and development for existing community. Adding more and more people will create chaos and burden on existing infrastructure, facilities. This area is newly establishing, adding more housing going to increase crimes and drugs related issue which is not safe for communities and school going kids.

Proposing new houses without adequate infrastructure risks compromising the well-being of our community. Expanding housing without addressing existing infrastructure gaps exacerbates concerns such as drug-related issues and crime.

Schofield and Tallawong areas public facilities are very less compared to its growing population.

Developing high density housing will put more burden on the facilities.

Area around Schofield station is too crowded during morning and evening time, this will make situation more worse.

But we need is more schools parks, community center

we strongly oppose this proposal as there has been many apartments already built near Schofields station (at the end of Pelican road). There has been a heavy traffic already in Schofields roads and Additional 1800 dwellings will increase the traffic congestion further. There are not enough parks and schools built in Schofields area but it's sad that council is proposing additional dwellings that will create more congestion in the vicinity. I'm really saddened that Schofields is being transformed like a slum area. We kindly request not to abolish this proposal

I object for following few reasons.

- the public infrastructure such as roads, schools, childcare facilities and medical facilities are not sufficient as it is. The proposed plan will make it worse.
- the value of the property will have significantly impact
- government should invest in infrastructure
- it is very difficult to find car parking at the railway stations and metro

This influx growth will is not ideal and I'm opposing the propose idea.

Paying through our noses and bearing the brunt of the high interest rates we have barely managed to buy a property in this area away from the city crowd in an area deemed to be safe. Social housing is going to change the dynamics of the area while still bleeding because of the high EMI.

Before proceeding with any new planning in the areas I highly recommend to first work on developing new amenities like new road connection, flood evacuation routes and plans and increased public transport parking.

Currently, all the above suggested items are concern in the area and if these items are overlooked and this new planning is approved will make the area further congested.

There simply is not enough infrastructure in Schofields to support such a proposal, such as roads, schools, parks etc. Playgrounds and parks are scarce, for example, what is happening with Ken Birdsey park construction? Schools are overwhelmed, with more than 1500 students in some schools and classes on demountables. I suggest the council focus on providing adequate facilities to the current residents first and then think about any expansion. Thanks.

Adding too many apartment dwellings in the area will make schofields more congested and our infrastructure cannot cope with this. Traffic is already so bad now considering that 10,000 apartments are not even built yet. This is poor planning by the council. We lack parks, schools and roads. This needs to be stopped.

Submission

We are a community of highly educated and skilled individuals with young families, who have worked tirelessly to achieve our current standing. As contributors who bear a significant tax burden, we take pride in maintaining the integrity and prosperity of our neighborhood.

It is evident from existing apartment complexes that incorporate social and affordable housing that our area could face significant repercussions, including an increase in criminal activity, drug use, and violence. This threatens the safety and well-being of our families and undermines the values we uphold.

The proposed site is adjacent to our local Coles and Woolworths, establishments we frequent regularly. We fear that the proximity of the apartment complex could detract from our enjoyment of these essential community resources. Moreover, children from families

struggling with drug use and violence could potentially have an influence on our children at school.

Furthermore, the potential decline in property prices would have serious financial implications for many of us, jeopardizing our ability to maintain our current standard of living.

While I am supportive of initiatives aimed at addressing housing affordability, I urge you to carefully reconsider the inclusion of social and affordable housing units in the proposed apartment complex at Schofields. Alternative solutions that prioritise the safety, well-being, and prosperity of our community should be explored. For these reasons I'm strongly objecting this project.

An already crowded suburb with little infra is not going to be able to handle so much. Its wrong at every level. Start using eastern suburbs - they have plenty of infrastructure to share with a much lesser population when compared to greenfield suburbs.

I am objecting the proposal as it will impact public parking, crowded community traffic. Schofields do not have enough infrastructure to support. Trains and buses already crowded and will not be sufficient to cater for huge population growth. Schools are limited to cope with population. Blacktown only hospital available. Rouse hill hospital has been promised for years but build yet to complete.

Hi There,

Schofields Train station is already crowded and the coles and woolies are not able to cover all the residents for their daily needs. Not to mention about more schools , Medicare needs or a proper shopping complex which is a right fit for those 3 lots.

Has anyone noticed how crazy are the car parks both at Schofields and tallawong. With increasing housing every year what's the government plan to manage traffic and greenery. Railway Terrace road is already crowed and very congested , has there been any analysis on this.

Moreover, Sooner or later the metro needs to connect to St Merrys station via Schofields has there been any thoughts for this ? Richmond training needs upgrade soon too. This means Schofields train station will be the main central point and heart of suburb including

nearby suburbs like Riverstone, tallawang, quakers hill, Nirimba fields, Grantham farm, coleebe, marsden park , Dean Park and many more. Please consider these lots for utilising wider development of the suburbs and thinking it's brighter future. Social housing is a need but not at cost of overpopulation. Think smart and think again.

Thank you

Submission

I strongly object it due to the following reasons:

- high possibility of antisocial activities that can influence the children.
- traffic congestion. Burdekin road at the moment is heavily congested with no service roads and proper entry and exit to residential areas.
- this can heavily effect the property values in the area negatively. Those bought the properties at higher prices will be at loss.

The location is already crowded with no amenities or parks and the council is not doing a good job in upkeep anyway . This will increase the traffic and we are not talking a few hundred units . We are talking 1000s. It would be better to distribute amongst other suburbs.

Hello,

As a resident of Tallawong suburb, I would like to object this proposal due to the lack of schools, parks, public transport and other facilities that's not even capable enough to support current demands. And with additional 1800 dwellings, this place will look like a slum.

We don't even have a single park in this suburb. We rely on private transportation and the parking in the metro and stations are always full.

Submission

Hi,

I would like to submit my objection to this 1. proposal for the reasons below:

1. The area around the place is already quite densely populated.
2. The public schools are already overwhelmed and there is a lot of construction activity still ongoing.
- 3.. There are very few green spaces and parks for the children to play.
4. Traffic is already a nuisance during peak hours.
5. Lack of parking near the train station.

For all the above reasons, I would request to first sort out the infrastructure before trying to build any high density zones.

I agree to the above statement

Yes

I object to it

Submission

The existing public infrastructure is already struggling to cope up with the rising population of this area. As it is the entire community of Tallawong & parts of riverstone close to Schofields road - uses the parkings, parks in the schofields area - due to lack of these amenities in Tallawong. The bus services in these areas are terrible and the traffic situation is getting worst by the day...There are already several apartments coming up along Schofields road and in the

vicinity of the proposed development. Further increasing the population density in this area will just make matters worst for a already miserable standard of living.

I strongly oppose this proposed development and would like the focus diverted on providing better services (roads, parks, ovals, community centre, medical facility, walkways, bike paths and parking structures)to the already crowded community.

Thanks

Submission

The quality of life is already impacted by the residents of Schofields, Tallawong, The Ponds and other adjacent areas due to the following

Lack of parks

Lack of schools with growing population

Lack of healthcare facilities

Traffic congestion

With the proposed residential construction, this will further impact the quality of life of existing people residing in these areas. The area is getting congested with traffic jams in peak hours. Please do feasibility study as to the impact of these residential apartments (newly or about to be completed) which have already started raising concerns for the residents.

Schofields/Tallawong is already over crowded. Cars parks are full by 7:30 in Tallawong and schofeilds ., train frequency in schofeilds is not great .. Public infrastructure needs to be upgraded prior ,brining in additional housing .

Lack of good public high school.

Schofields road is busy as hell , not enough parks .

Adding more housing will add stress to current infrastructure and public transport which are quite poor.

I object this project

Hello there,

I would like to point out below issues and I hardly see a reason why we would like to add another 1600 - 1800 dwellings to the suburb with out fixing these first.

1. The roads are crammed during peak hours
2. The schools / childcare centres are not ready to accomodate more residents
3. The metro parking is a joke, we barely can find a spot after 7AM
4. There is barely any parks for children
5. No footpaths, no green plantation etc

Please improve the quality of life for existing residents before adding more to the suburb.

Hope it makes sense

We are a community of highly educated and skilled individuals with young families, who have worked tirelessly to achieve our current standing.. As contributors who bear a significant tax burden, we take pride in maintaining the integrity and prosperity of our neighborhood.

It is evident from existing apartment complexes that incorporate social and affordable housing that our area could face significant repercussions, including an increase in criminal activity, drug use, and violence. This threatens the safety and well-being of our families and undermines the values we uphold.

The proposed site is adjacent to our local Coles and Woolworths, establishments we frequent regularly. We fear that the proximity of the apartment complex could detract from our enjoyment of these essential community resources. Moreover, children from families

struggling with drug use and violence could potentially have an influence on our children at school.

Furthermore, the potential decline in property prices would have serious financial implications for many of us, jeopardizing our ability to maintain our current standard of living.

While I am supportive of initiatives aimed at addressing housing affordability, I urge you to carefully reconsider the inclusion of social and affordable housing units in the proposed apartment complex at Schofields. Alternative solutions that prioritize the safety, well-being, and prosperity of our community should be explored.

Already Schofields/Tallawong is overpopulated with road/school infrastructure insufficient for the current population, the quality of life is degraded. There are already high rises constructed around Tallawong Metro and more high rises is at the cost of more traffic congestion and leads to explosion of population unprepared for.

We are a community of highly educated and skilled individuals with young families, who have worked tirelessly to achieve our current standing. As contributors who bear a significant tax burden, we take pride in maintaining the integrity and prosperity of our neighborhood.

It is evident from existing apartment complexes that incorporate social and affordable housing that our area could face significant repercussions, including an increase in criminal activity, drug use, and violence. This threatens the safety and well-being of our families and undermines the values we uphold.

The proposed site is adjacent to our local Coles and Woolworths, establishments we frequent regularly. We fear that the proximity of the apartment complex could detract from our enjoyment of these essential community resources. Moreover, children from families

struggling with drug use and violence could potentially have an influence on our children at school.

Furthermore, the potential decline in property prices would have serious financial implications for many of us, jeopardizing our ability to maintain our current standard of living.

While I am supportive of initiatives aimed at addressing housing affordability, I urge you to carefully reconsider the inclusion of social and affordable housing units in the proposed apartment complex at Schofields. Alternative solutions that prioritise the safety, well-being, and prosperity of our community should be explored.

I'm concerned about the increase in crime, over populated roads which can't handle the current population.

Due to close proximity of housing to Woolworths and Cole's I'm concerned that there may be an increase in damage to locals vehicles. There have already been incidents which persons have damaged others property.

And the devaluation of my home. People in this area have worked hard to build homes for their family, like I have.. A housing estate will decrease the value of hard earned money and home.

Dear Council member,

I am writing to object to please not have housing as with a large young family community within the areas near the station and a newly opened public primary school, the issue with increased crime rates and unsocial activities are only going to hamper a developing area.

The social stigma against the area will get worse.

Please.

Thankyou

There a lack of infrastructure, public transportation and social amenities in Schofields already.

This development will make it worse and further add chaos to the life of residents.

An example, parking spaces for train and metro stations gets full on Weekdays at 7 am. It's ridiculous and there are limited trains or buses to go to CBD.

We are already facing challenges that affect our work life balance and request this development to be towards Penrith where there is existing public infrastructure and social amenities.

This construction will create lot of problems in Schofields area, there will be lot of traffic where the traffic conditions are already poor. Problems with huge traffic in trains from Schofields.

There are very few small parks are present in schofields and this crowd inflow will impact that as well. There are many more reasons to object this construction.

Hence I object this.

I strongly disapprove of developing Emblen Park on the corner of Bruce and Weedon, As a resident of Weedon I see on a daily bases Children using the park and also the big field area to play and run around, learn to ride their bikes in our quiet small street.

There is no need to build on this particular part in Tolland.

I also have major concerns regarding safety, from new roads going alongside the pump track and the brethren church, to safety from people breaking into our homes and damaging our property which one look at the part of tolland you are trying to "improve" alot of people have no respect for their own property let alone others.

This is not a well planned out estate. And one look at Bruce street flats you can see that high density is not a solution for Tolland.

As a resident of 4 years in Tolland, I strongly disapprove of this plan as it includes the removal of Emblen Park a place I which children play football and games within the safe watch of homes, The other park off Bruce Street next to the Hub is a highly unsafe area tucked away from the road and has too many places children can be taken and hurt by others. The park on the corner of Weedon and Bruce has alot of people playing there, mothers on a daily pull into weedon to go for a play with their children. And know they are in a visible park that's safe.

I also strongly suggest you take a hard look at the high density of Bruce and Anne Street flats and realise that this type of housing is very unstable for Tolland. NO BUILDING ON EMBLEN PARK !!!

Nyrang Street is now becoming an access thoroughfare from Maher to Bruce and vice versa.

This culdesac is made up of 6 houses 2 facing north onto Maher street and 4 within, 2 facing east and 2 facing west. These are all private dwellings. They were purchased in accordance of having privacy and [REDACTED] also due to no through roads and greenspace for its "serenity".

We at Nyrang Street and myself at [REDACTED] object to the through road. We have grand children playing in front yards and this will now become a race track as Maher street is currently and a dangerous street.

In the plan that I have viewed, there has been no mention of the culdesac's that have been subjected to the above plan of through roads in written form just drawings.

This plan shall be detrimental to the value of the "private" residential housing in this above mentioned culdesac.

If this is to be continued we as residential rate payers shall be seeking compensation from WWCC and the State Government.

Myself personally shall be seeking compensation and if the WWCC or State Government would like, can purchase my dwelling at an agreed value.

If not we shall see you in court!!

The infrastructure here cannot cope already. Richmond rd is a carpark at best. Please come and have a look at the Schofield station traffic on railway Pde where this proposed site is. This afternoon it took me 8 minutes to turn right from schofields onto Railway Parade. The government says they will build supporting infrastructure, this is untrue. I am also reading stories from people who have children at the public schools that the schools are combining classes of different year levels due to the amount of children and the lack of resources. Now you want to cram more high density housing in this area. My daughter can't even get into a local daycare centre, she has been on several wait lists since before she was born. This area is busting at the seams. Build the infrastructure needed for this area to cope first, not cram more people in here. Ludicrous! My estate has been waiting for the council funded park to be built since 2018. That's 6 years and still absolutely nothing. In this proposal you're saying it will provide an opportunity for new parks etc etc. When will you build them 2030! The footpaths are overgrown and unmaintained, on top of that the

garbage collection is rubbish (pardon the pun) consistently a day late sometimes more. Clearly the council cannot keep up with the ever increasing population. I would also like to remind you of the empty promises from the previous government, they promised a multi story car park at schofields station if elected, then they reneged and built a single level car park that already cannot cope with the population numbers. The crime here is increasing too. The police are obviously stretched thin. I used to love living here, not any more! I do not wish to raise my children here.

There is no clear information in this packaging regarding upgrading of local roads, health, education or public transport infrastructure. This should be done and completed PRIOR to the commencement of the building of these additional dwellings. The current infrastructure in this surroundings of this proposed zone is already struggling to keep up with the population of the area. The roads already struggle with the current load of travellers. Richmond road sits at a stand still as well as old Windsor road during peak hour. There will not be enough parking infrastructure at Schofield station nor tallawong station. This is concerning, too much of my life is already spent commuting and I do not want this to increase. I would like to spend more time with my family than with my car.

This is going to have a huge impact on traffic for a start not to mention existing schools, medical and sporting facilities. I do understand we need more housing however perhaps less high density and a little more green space. If the public transport and education infrastructure was in place first residents may be happier to move out a little further than just moving up 4 or 5 stories just to be close to facilities

We don't have the infrastructure to support such influx of population. Old Windsor road is choked and we witness heavy traffic jams even in the middle of the day. There is not enough parking available for commuters. There is a need for wider roads and better transport facilities before the housing.

The development is far enough away from our place but I note from some of the information offered in the proposal, there could be issues.

1. Whilst rainwater onto an undeveloped site tends to soak into the ground (with the saturated site then sending water into the local creek and drainage systems), this development will be a concrete water catchment (no soaking in). I note the reference to a water retention system onsite and a detention basin however, the ultimate end point for stormwater will be Eastern Creek and through urbanisation, its flow characteristics have changed and it now inundates area of Schofields a lot quicker than it did decades ago. Does the described stormwater systems in the documentation guarantee NO flow into Eastern Creek during heavy rainfall events?
2. The energy authority advises that there is sufficient capacity in the area to support the number of apartments nominated in the proposal. Is this guarantee based on a calculation to supply EV charging points for every parking space allocated for each apartment? Noting

the current parking issues across the area (greater number of vehicles per dwelling/apartment), is there going to be a minimum of two vehicle parking spots per apartment?

3. The information offered in the documentation makes no reference to TfNSW intent to close Railway Terrace and turning it into a cul de sac in line with the Burdekin Road overpass project. This will see Pelican Road as a primary by pass road. Is the documentation going to be amended to acknowledge this?

High density apartments create slums! Our area is already busy enough on the roads, the shopping centres, public transport, we cannot handle this and we do not want this. Young people such as myself who the affordable housing should be aimed towards do not want to live in these slums either, build more affordable HOUSING not high density apartments slapped in the middle of the suburbs. This is upsetting and disappointing for the long-term residents of the area and surrounding areas.

Further to early submission I note that Jemena Gas have indicated that they are able to supply gas product to the proposed apartments.

I thought that government policy was to move away from gas in favour of electricity and, if that is the case, this would be in contravention of that policy.

1. Parking towards the station is big mess during day hours and adding more apartments making it worst. Either multi storey parking should be constructed before this plan. Need to know what is plan to accommodate 100s of cars which are parked outside parking slots right now. Forget about future
2. Focus should be to wider the road further making it bearable
3. Where is public hospital. Rouse hill is torture for emergency services and it gonna be nonsense to add more housing

Hi

I strongly object the proposition of building a 1500+ apartment block in Schofields due to the following reasons:

1. Not enough parking near Schofields station
2. Already congested roads due to population growth in all suburbs near Schofields (Schofields road, Quakers hill pkway, Windsor road, Richmond road etc)
3. More then a year wait for day care / child care.
4. Shortage of Primary schools

5. Very less option of high schools around

6. No hospitals nearby and the closest one currently is Blacktown hospital which is already full.

7. Not many playgrounds for young families.

The infrastructure we have in Schofields/ Tallawong at the moment is not enough to cater for the current residents. If we add another 1,500+ more residents there will be chaos in the already crowded suburb.

I strongly disagree with the building of this apartment block in Schofields.

There are not enough services in the area now. How do you expect people to cope as the population increases? The plan needs to include better roads, better public transport, affordable healthcare/hospital, education.

Parks need to include space for various demographics, including teenagers. The area will become undesirable and filled with crime if you do not make it appealing for full time workers. You will drive decent people away from the area if you continue to increase the population without planning for the consequences of this growth. Sitting in traffic for hours because the roads can not handle the volume is unexceptable. There is not enough parking at the stations. How are people meant to commute to work. This plan will appeal to people on welfare, but what about the hard working locals who have bought in the area before the plan for this major popluation increase. You are leaving no appeal for the area if you keep cramming people in with little to no services. Where is the long term planning???

As someone who lives in an apartment block in Schofields it is completely unethical and unsafe to put that many apartments up

There is daily robberies and people's cars and personal items being stolen in the garages and on the street

There is no parking for the people who live in the apartments who pay over \$500 in rent

The people who purchased there homes and apartments for large amounts should not have to live in social housing where they are paying up to 7% in interest rates to afford their homes

I understand perhaps building 4 storey homes (though also not ideal), but 8 storey homes will completely ruin Schofields. Currently we pride ourselves by the fact that the blue mountains can be so vividly seen from Schofields, but such large buildings will completely block them! Additionally that area is completely not fit for 1700+ homes! There are no footpaths, no proper planning in place, the area is never looked after by the council and is always full of rubbish and hardly ever is the area mowed! (Plus nearby area) Schofields should first become a priority for Blacktown city council in regards to looking after what we already have and then make plans. Currently the council is failing at delivering basic needs for THE EXISTING community.

I am writing to express my strong objection to the proposed housing commission development project in schofields As a resident of this community, I am deeply concerned about the potential negative impacts this project may have on our neighbourhood and the surrounding environment.

I urge you to reconsider proceeding with the current plans for the housing commission development and to instead prioritise the well-being and interests of the local community.

We have consulted our neighbours and there is general consenses that there are not enough schools, playgrounds or hospitals in the area. The train station and bus system requires an upgrade

In light of this, adding 1700 units with 33 percent allocated to social housing does not make sense. How will the council cater to the needs of existing and new families when the units are built?

The number of units should be reduced with a lower number allocated to social housing (5%).

I agree to the above statement

Submission

I am writing to express my strong disagreement with the proposal to build social housing in our community. While I appreciate the efforts to address housing needs, I believe this particular development plan raises significant concerns that warrant careful reconsideration.

Firstly, I am deeply concerned about the potential impact this social housing project may have on our community. Introducing a large-scale development of this nature could disrupt the existing social fabric and undermine the character of our neighborhood. Increased population density may lead to overcrowding and strain our local resources and infrastructure, including schools, healthcare facilities, and transportation networks.

Furthermore, the proposed location for the social housing development may not be suitable for such a project. The area in question may lack the necessary amenities and services to

support the needs of new residents adequately. Additionally, concerns about property values and neighborhood safety have been raised among residents, which could have long-term repercussions for homeowners and tenants alike.

While I recognize the importance of addressing housing challenges, I urge the council to explore alternative solutions that are more conducive to maintaining the integrity and sustainability of our community. This could include revitalizing existing properties, implementing mixed-income housing models, or collaborating with local stakeholders to identify suitable locations for social housing developments..

I strongly believe that engaging in transparent and inclusive decision-making processes is essential to ensuring the long-term success and well-being of our community. As such, I respectfully request that the council carefully consider the concerns raised by residents and explore alternative approaches that prioritize the interests and aspirations of all stakeholders involved.

Thank you for considering my perspective on this matter. I look forward to the council's thoughtful deliberation and constructive dialogue on how best to address our community's housing needs.

My suggestion to object is made on the following considerations

- Infrastructure will not be able to cope with sudden influx of 10000 individuals, social issue with a high concentration of people with economically disadvantaged.
- Insufficient infrastructure already under strain, potential social issues arising from concentrated affordable housing, and the negative impact in surrounding property values.
- I strongly disagree that there will be any traffic impacts due to this. A influx of 10k individuals will have a huge impact.

The infrastructure in the area, especially on the Railway terrace will not be sufficient to cater to this influx of people and homes.

Parking in the area is already a nightmare, especially on weekdays. High-density dwellings would further exacerbate this issue.

Additionally, the fact that there is not sufficient green space or parkland in the area has already impacted the environment, temperature, and the aesthetics of the suburb. Further increase in apartments will further decline the quality of the suburb and impact residents.

I live just off Burdekin road and note that having additional 1800 homes (cars) in addition to Landcom developing their site for new buildings will have significant impact on the environment, road , traffic and infrastructure. Need to first create good infrastructure set-up, maintain the environment and not over crowd it with sky rise.

I am writing to formally express my objections to the proposed Railway Terrace Schofield project. While I understand the importance of affordable housing initiatives, I believe this particular project raises several concerns that warrant careful consideration.

Firstly, the current infrastructure in the area is already strained and insufficient to support additional housing developments of this scale.. Introducing a large number of new residents without adequate infrastructure improvements could lead to issues such as traffic congestion, overburdened public services, and environmental degradation.

Secondly, concentrating affordable housing in one area could potentially lead to social issues, including stigmatization and marginalization of the residents. It is crucial to promote mixed-income communities to foster inclusivity and social cohesion.

Lastly, there is a legitimate concern regarding the negative impact of this development on surrounding property values. Studies have shown that the proximity of affordable housing developments can have a detrimental effect on property values, which could adversely affect homeowners in the area.

In light of these concerns, I respectfully urge you to reconsider the approval of this project. I believe it is essential to explore alternative solutions that address the need for affordable housing while mitigating the potential negative impacts on the community.

I object to it

Submission

I strongly object to the proposed high-density development plan for Railway Terrace. While development in Schofields is necessary, this plan raises significant concerns that threaten the existing community character and infrastructure.

Concerns:

- Excessive Density: Cramming 1,600-1,800 dwellings on 6.3ha far exceeds the zoned medium density, straining schools, healthcare, and transport.
- Traffic Chaos: This influx will overwhelm current roads without significant upgrades, leading to gridlock and safety hazards.
- Green Space Loss: Replacing valuable grassland with apartment blocks diminishes vital

community amenities and exacerbates the "heat island" effect.

- Community Disruption: Towering apartment blocks clash with the established neighborhood character, impacting visual harmony and livability.

- Social Housing Concentration: While allocating 33% to social housing is commendable, concentrating it risks stigmatization and hinders true integration.

Schofields 2762

Please provide your view on the project

I object to it

Submission

I am writing to express my concerns regarding the proposed development plan for the land in Schofields, NSW. While I appreciate the government's initiative to provide affordable housing, I believe certain aspects of the plan require careful reconsideration, particularly regarding the proposed increase in density from 16 meters to 32 meters (4 to 8 floors).

Schofields has experienced significant growth in recent years, primarily through the development of four-story apartment complexes. However, the proposed density increase raises several concerns:

1. **Infrastructure Strain:** The current infrastructure, including roads, public transport, healthcare, and schools, remains limited in the area. Such a significant increase in density would exacerbate the strain on these resources and negatively impact the quality of life for current residents.
2. **Existing Development Plans:** There is already an approved plan to develop a large

apartment complex behind Pelican Rd, comprising multiple four-story buildings. This development, once completed, would provide substantial housing at affordable prices, alleviating the need for further high-density construction.

3. Traffic and Parking Issues: Schofields faces challenges with parking at the train station and limited road capacity, particularly along the Railway Terrace. The proposed development would exacerbate these issues, potentially leading to further congestion and inconvenience for residents.

4. Preservation of Green Spaces: Schofields already lacks sufficient parks and green areas. Introducing high-rise buildings would further diminish the suburb's aesthetic appeal and adversely affect the privacy and views of surrounding properties.

To address these concerns, I propose the following:

1. Limit construction to the current zoning of 16 meters high for apartments and houses.
2. Expand Railway Terrace to four lanes (2/2) to improve traffic flow.
3. Prohibit parking along Railway Terrace to alleviate congestion.
4. Consider rezoning parking areas near the train station to accommodate commuter needs..

I urge the Council and State government to prioritize the interests of current residents and carefully consider the objections raised. By doing so, we can ensure responsible and sustainable development in Schofields.

Thank you for considering my objections.

This construction will create lot of problems in Schofields area, there will be lot of traffic where the traffic conditions are already poor. Problems with huge traffic in trains from Schofields.

There are very few small parks are present in schofields and this crowd inflow will impact that as well. There are many more reasons to object this construction.

Hence I object this.

I am objecting this project. There is already traffic issue on Schofields road and with the inclusion of so many units, it's going to be worse.

There is no proper connectivity to city. Trains are not frequent to city. The proposed metro line is also not going ahead after the announcement from government last year..

Already it's a night mare to get parking around any of the apartments around grima st.

Having social housing also will impact the property value.

I agree to the above statement

There is already so much population in this area with less infrastructure like roads / schools/ parking..

Adding this will create chaos and more difficulty for current residents.

We don't want suburb to be over crowded.

Already you can see high number of accidents in the suburb in the whole year.

We want peace for current residents and not chaos.

This area is already congested and lacks essential infrastructure such as high schools, hospitals, shopping centers, daycares, aftercare facilities, and playgrounds. The waiting period for daycares is more than six months, and for hospitals, Blacktown or Westmead, it's concerning. Similarly, dental or general practitioner services only in Marsden Park or Rouse Hill. Implementing this plan will only exacerbate the existing issues. Also parking at Schofields station is already packed. Proposed plan will make the situation even worse.

I object to it

Submission

The project is not suitable for Schofields or Riverstone due to various factors including existing development patterns, infrastructure constraints, and community dynamics. It is not conducive to accommodating such a large-scale development. The infrastructure around Schofields and Riverstone may not be equipped to handle the influx of residents that a project of this magnitude would bring, potentially leading to strains on transportation, healthcare, education, and other essential services. Additionally, the character of these suburbs may be fundamentally altered by the introduction of high-density residential developments, which could disrupt the existing community fabric and exacerbate social tensions. Therefore, it is imperative to reconsider the suitability of the place for this proposal and explore alternative locations that align more closely with the needs and characteristics of the surrounding area.

I strongly oppose the construction of so many units best the train station which will have social housing as well. We fear it will definitely have a negative impact on our neighborhood. It will increase crime and safety will become a concern. We will be forced to sell and move elsewhere. We bought House thinking it will be a quiet residential suburb where our kids can grow up.

The whole Schofields, Nirimbafields area is a good residential area which provides a good community for growing family & kids.. Most families who move here are the part of growing skilled migrants. They all have sacrificed a lot in order to move from their home, get a job, save each penny to have a piece of land & house in this area to live in a good community which help their kid to grow as good citizens of Australia and adopt the Australian life style.

So having a public housing next to this area will disturb the peace in the area, increase the crimes & probably increase the drugs absorption in this growing community of kids. Already the interest rate, cost if living, lack of ample daycares, good schools & high schools & rugged transport are the pain areas to solve in this community. Personally I don't want to increase the pain & stress. It is better to leave this area for some other community driven things to develop rather building high density apartments along with public housing.

Submission

Dear Sir,

I am writing to express my firm opposition to the proposed social housing development in our neighborhood. As a concerned resident, I believe that such a project would have adverse effects on the community's well-being and livability.

While acknowledging the importance of providing affordable housing, the proposed location raises significant concerns. Introducing social housing into our area without adequate infrastructure and support services could potentially lead to an array of issues, including increased strain on local resources, decreased property values, and compromised safety for residents.

Furthermore, the lack of meaningful consultation and engagement with the community

regarding this development is deeply troubling. It is imperative that the concerns and perspectives of local residents are thoroughly considered and addressed in any decision-making process pertaining to our neighborhood's future.

Rather than concentrating social housing in one specific area, I urge you to explore alternative strategies that promote inclusive and sustainable development across the region. By adopting a more balanced approach to affordable housing distribution, we can ensure equitable access to housing while safeguarding the integrity and vibrancy of our communities.

In conclusion, I respectfully urge you to reconsider the proposal for social housing in our neighborhood and to prioritize community engagement and collaboration in future planning endeavors. Together, we can work towards solutions that benefit all residents and enhance the quality of life in our area.

Thank you for your attention to this matter.

Sincerely,

Lopamudra

Submission

Dear Sir/Madam,

I am writing to express my strong opposition to the proposed development of social housing in our area. As a resident of this community, I believe that such a project would have detrimental effects on the neighborhood and its residents.

While I understand the importance of providing affordable housing options, I believe that the proposed location is not suitable for such a development. Introducing social housing into our neighborhood could lead to a variety of negative consequences, including increased crime rates, decreased property values, and overburdened public services.

Furthermore, the proposed development fails to adequately address the concerns and needs of existing residents. There has been a lack of transparency and community engagement

throughout the planning process, leaving many of us feeling disenfranchised and unheard.

Instead of concentrating social housing in one area, I urge you to consider alternative solutions that distribute affordable housing options more equitably across the region. This approach would not only promote social cohesion but also ensure that all neighborhoods contribute to addressing the housing needs of our community.

In conclusion, I respectfully request that you reconsider the proposal to develop social housing in our area. I believe that by working together to explore alternative solutions, we can create a more inclusive and sustainable community for all residents.

Thank you for your attention to this matter.

Sincerely,

Siba Panigrahi

Both the sides of the proposed sites, have only 50% people living in with another 50% still building houses. Railway Terrace, Burdekin road is always choked at all times. The entry to the station is always busy and the whole traffic gets choked up in mornings and afternoons. Coming up with another apartment with 1600-1800 units first needs roads, parkings, and traffic infrastructure to be setup. This is the condition with just 50% setup and another 50% still building to move in. How do you see another 1600-1800 units can fit in here? This will get cramped up. Rather give us a park or something green as this area doesn't have any.

The proposed development will overpopulate an already crowded area. We don't have the infrastructure to support more units or apartments. If public housing is built here why do we pay such a high premium for land here? Not only will this bring more crime but also burden our roads further, increasing traffic and more chance of accidents. This area is severely over populated already.

We already have too many robberies in our apartment building and social issues in our area.

We also would never have purchased the property having known this area is about to be two blocks from housing commission area. This will doffinately decrease the value of our property.

I object for this building to be built for the purpose of housing commission.

Thank you in advance for your time and support on this matter.

Hi,

I would like to highlight the issue of road infrastructure that this additional high density housing will create. Try turning right from schofields road to old Windsor road or try crossing hambeldon roundabout in the morning or try Richmond Road. All roads are jammed in the morning and already spending significant amount of time.

Along with that there is no high school close by in schofields, no hospitals.

Please consider this decision.

Regards

Daman

Our suburb is already crowded, and adding more apartments is not ideal. Additionally, introducing social housing in a premium suburb may not be favorable. I've invested a significant amount of money in buying this house, and having around 550 units of social housing would be excessive and could negatively affect property values and the overall atmosphere of the suburb. With the current increase in crime rates, including car theft and break-ins, this new development could become uncontrollable.

The infrastructure around the Schofields train station and Tallawong metro station is not even enough to support the existing community around the area. The car parking at the train station and metro station are too small. Hence, we shouldn't add such a large housing project in this community in this area until the facilities around Schofields area are uplifted.

Even the roads (especially Schofields road) needs to be broadened to support the traffic and to avoid congestion.

Thanks.

I strongly object to the development of 1600 more dwellings in the area and making it high density.

There is already havoc on the streets and roads of Schofields with so many cars and parking. Streets are already very narrow and struggling to manage the existing traffic in the area.

Creating 33% for social housing is a complete breach of trust that residents had while buying in this area.

Dear Sir, in my humgle opinion, I am living here for over 5 years now.. The amount of traffic that has grown is unimaginable, as this rate, if there are more units specially social housing is added, this will make the traffic congestion more worse.

Kindly any of your goodselves, please check on any working day, come to the railway terrace street, you would end up spending so much time, that too if you need to catch a train or get your kids to school, then spending 20-30 minutes just to get to the other side of the street will be a nightmare.

Few suggestions, please expand the railway terrace road to 4 lane, and remove the round about at the railway station, instread, put up a flyover like that is in Blacktown. This way we can circumvent the traffic congestion. After doing all that plan for more units.

I object to the proposal given it does not fall in line with the other builds within walking proximity.

We have been approved for medium density and even that, at its maximum numbers will already put pressure on the infrastructure at Schofields.

High density apartment towers will inundate our suburb with roads with a large number of residents, well beyond the capacity able to be handled by current infrastructure and roads.

This is a large development with significant traffic impacts. There are currently many bottlenecks on the train network and roads that will not support the proposed development.

One justification for alleviating this is the planned extension for the metro to Schofields station however the last official update of this ballparked the development to be 2045, no work has been completed toward this goal, nor any commitment from the government.

Railway terrace currently backs up a significant amount on a daily basis with the poor station design on that side. Schofields Road backs up turning into railway terrace daily, often taking more than 7 minutes to turn. Further down, the improvement of Schofields and Old Windsor has helped but the short light rotation means a delay a long wait (also 7+ mins) to turn.

During peak hour, Schofields road is bumper to bumper with traffic as turning lanes overflow and block traffic. Many people drive to Tallawong station for more convenient transport however both Tallawong and Schofields station fill up by 7:30AM on most days.

In my opinion, for this project to be viable, we need increase traffic flow between Schofields station and Old Windsor Road. A more direct route for traffic to get over the Schofields line (one has been proposed) and the commitment for the Metro line to be extended to service the area.

The reason to object is the insufficient infrastructure already under strain, potential social issues arising from concentrated affordable housing, and the negative impact in surrounding property values.

I would suggest we build schools, hospitals, station parking and playgrounds instead or upgrade the station with better facilities.

Can we also understand how the council is planning to accommodate for the influx of people moving in, especially if 33 percent of that quota is allocated to social housing?

This is a very new and residential area with a lot of growing families. Subjecting part of the development to social housing will severely affect the dynamics of the suburb. I strongly object this coming near my house.

These roads are already very crowded. Another 1800 units will choke these roads, particularly Railway Terrace. It's so hard to enter Schofields Station drop off/pick off area in the peak times. With Another 1800 units it will become a nightmare for local public.

There is less infrastructure for the existing population, with no high school and congested roads. The place already has lot of apartments built next to it and the place is so congested. Further development will make the things worse.

Traffic is already on peak when we go to station, There is always a big jam. Parking is always an issue close to station.

Building another 1800 units will block the roads and it will be a hassle for people to reach office on time and for students can get panic as they can get late to schools/Universities.

A Big NO to this idea.

Regards

This proposed project makes the place very crowded and current infra would not support transportation and local shopping complex we got also there is no adequate parking to support this kind of residential proposal . This is on top of other developments happening in this suburb and also concern about the safety with in this suburb with social housing proposal.. genuine ppl struggling due to financial crisis completely understandable but people doing drugs and seeking social housing is always a concern and is a major concern in this quite suburb which is one of the prime suburbs in blacktown council

Hi, can we please use this for a High School instead in Schofields . There are many primary schools in and around Schofields i.e. Schofields PS, Galungara PS, Hambledon PS, Nirimba Fields PS, Tallawong PS.

Secondly the traffic in and around that area is already congested and this will compound the problem given the fact that there are already other flats which are close to getting built or will begin construction shortly.

The other alternative might be to have some space for parking and a mid-sized mall because the shops in Schofields village are very limited. There are good varieties in Ponds (Ponds Village and Stanhope Village) and Marsden Park but none in Schofields.

The Schofields Railway Terrace section cannot support any more population growth. It would be insane to add more residents to the area without delivering infrastructure projects to support this bursting population. I am unsure if there is any heed given to the concerns of the residents as private and commercial interests always supersede the interests of the suffering public. While affordable housing is important it is the sheer incompetence of the planners to not plan infrastructure ahead of these housing plans..

The reason for opposing this is there is not sufficient infrastructure to host these many blocks (almost as big as the complexes being built on the Metro line) which faces a pivotal road - Railway Terrace. This road is one of the 2 only roads (Schofields Road being the other) that connects to Windsor Road from those staying behind the Schofields station including those from the ever growing Marsden park housing estate. This road in front of the proposed residential block is still a single lane and in the place where it widens to a double lane, it does not even have a divider between the roads and is a 50 km zoned road. The road needs to be widened adequately along with the overbridge from Colebee connecting to the Burdekin Road before any such plans can be considered for approval. Already there is a long traffic queue to turn from the Schofields road into the Railway Terrace Road. This high density is planned next to a shopping complex which again is used by the 2000+ house dwellings that are built or planned for the area. This will add to the traffic issues being faced during peak times and extend to off peak as well.

There are also many apartment complexes planned or built behind this proposed dwellings. kindly review the occupancy rates of these complexes as well as others that are not yet occupied fully.

Strong reasons for objecting to the proposal:

1. ****Impact on Property Values****: Introducing a high percentage of social, affordable, or build-to-rent dwellings could potentially lower property values in the area. Homeowners may be concerned about the impact on their investment and ability to build equity.
2. ****Strain on Local Resources****: Concentrating a large number of lower-income residents in one area could strain local resources such as schools, healthcare facilities, and public services. This may lead to overcrowding, longer wait times, and decreased quality of services for all residents.
3. ****Economic Sustainability****: An imbalance in housing types may affect the economic sustainability of the neighborhood. A lack of diverse housing options could deter

businesses from investing in the area, limiting job opportunities and economic growth.

4. ****Social Cohesion****: Creating a homogeneous community in terms of income level may hinder social cohesion and diversity. A mix of income levels fosters a sense of community and encourages interaction between people from different backgrounds.

5. ****Stigmatization of Affordable Housing****: Concentrating affordable housing in one area can perpetuate stereotypes and stigmatization of low-income residents. This may lead to discrimination and prejudice against those living in affordable housing units.

6. ****Long-term Sustainability****: Focusing solely on social, affordable, or build-to-rent dwellings may not address the long-term housing needs of the community. A more balanced approach that includes a variety of housing tenures ensures sustainability and resilience in the face of changing demographics and economic conditions.

Hi,

I object to it on the following grounds:

1. Such high density dwelling will cause additional traffic woes on the distinguished road. Issue with parking already exists.
2. No planned insight onto metro construction timelines. The bus and train frequencies are inadequate.
3. Schools and Hospitals available in the area will not be able to accommodate such huge intake of new residents.
4. No high school in Schofields, government is still looking for land.

Suggest is to first build the infrastructure before approving big projects.

The infrastructure at schofields may not be able to cope to this change. The car park built near station is full by 8AM. Even though houses are built at walking distances to station parents tend to use vehicles to drop kids to school or day cares and would prefer driving down to the station. Walking distance to station does not mean all the population would have jobs along train line to CBD. Most of jobs western suburbs are at Industrial or business parks where there are bus or train network. Personal vehicles are only option and this will add more traffic to already clogged roads on schofields and Richmond roads. Developers like DHA, Landcom & Stocklands have already plans to add more housing near station to add to this capacity.

Schofields does not have high school. A makeshift primary school has been setup at nirimba fields. Can the existing school infrastructure cater to this development? Nirimba fields boasted of world class throw ball, tennis courts which not yet come into fruition!

Youth do not have adequate play/recreation areas around schofields.

In addition, the closest hospital is blacktown 20 mins away. Minimum GP clinics around schofields. Marsden park clinic at capacity and has 2-4 hour wait times!

I believe the government should focus on building infrastructure first and then change zoning for newer western suburbs. Government can focus on redeveloping inner west / eastern suburbs where there is substantial transport & infrastructure developed to cater to higher population.

Infrastructure is not ready to match this type of development. Schofields road/South street, Richmond road and Windsor roads are already extremely jammed in the peak hours. The train services are not able to meet current public demands. The parks and schools are very limited in and around Schofields. I am quite certain that this type of large development will make things only much worse.

Infrastructure needs to be built first to even think of such massive development.

With all the new apartments and dwellings within the suburb, the current infrastructure is already struggling and cannot support the current population growth. The proposed housing commission will further worsen this situation, thereby creating a deficit of infrastructure to support the suburbs growing population and their needs and will put immense strain on the already struggling infrastructure, people and communities residing within the suburb. This will also increase the probability of increase in thefts & criminal activities thereby negatively impacting the residing population, community, harmony and housing prices.

I object to it

Submission

The proposed social housing development in Schofields lacks crucial infrastructure such as roads, water supply, and public transportation, which are essential for supporting a growing population. Additionally, there are not enough schools in the area to accommodate the influx of residents that such a development would bring. This would further strain the existing facilities, leading to overcrowded classrooms and stretched resources. Overall, the proposal neglects the need for proper planning and investment in essential services, putting undue pressure on the community's already strained infrastructure.

Submission

I am

Objecting this development due to following reasons:

- 1) this development including social housing will significantly increase the crime and youth crime Rate in the family friendly schofields suburb. This very concerning for us as family and also to other neighbours in schofields.
- 2) this development will add too much overload on primary school, which is already having no capacity which cannot support the growth.
- 3) there is not even a high school in schofields and this development will only overload existing already over loaded riverstone high school.
- 4) why cannot dept of planning rezone this land be used for High school and help to build a high school and help with infrastructure and school in schofields.
- 5) this development will lead to more congestion on the roads with too many houses in one Area.

I live near to this developement was proposed. I am already walking from home which takes me 20 minutes as there is no parking available. Currently all the surrounding suburbs have only one station and hence no parking even on the streets. With employers forcing back to work this will on get worst.

Dropping kids at school is already clogging the roads. We have a high school walking distance but was not zoned as the schools are already overflowing with kids.

Driving near the appartments has been so dangerous as there is high traffic in the narrow roads.

Crime has been high and dangerous driving on the narrow streets are commonly observed. Get down at station and walking is no longer looking safe

Please do not make the community burn with this rezoning

This will create an addition to the already excessively cramped up area

The area lacks all basic transport and other community facilities

Addition of these social housing and high density apartments will ruin the area in all aspects

I strongly oppose to this development and request government to think how the parking and other community facilities can be provided

There no not enough primary or high schools in the area

The schools are running to full capacity and students seated in those demountable

Please plan infrastructure and other facilities first before planning more housing in the already overly populated area

1800 houses will bring minimum 1800 cars on the rhe road. There is not enough infrastructure, no shopping malls,no parks, train facilities are patehetic, not enough buses, no high schools, not enough public schools and even not enough roads to travel. Already people are struggling to manage with minimum resources. We need more resources,not more people.

It is proven from the past result that housing commission has always increased the crime rates in the suburb. Why always Blacktown council allows that. I don't see this happening in any other councils. Does Blacktown council doesn't care about quality life of it's people?

I object to the proposal on Railway Terrace, Schofields for a new apartment to accommodate 1800 including social housing. My reasons being:

1. Increase in crime rate due to social housing. As 80% residents of Schofields are working people and they are not home, there will be increased crime. There is no security for living safe.
2. With the present population, Schofields is already chaotic on the roads, as they are narrow lanes especially near Station
The traffic is very high and unmanageable. This will become worse with new apartments
3. There is no high school for Schofields and we are forced to join our kids in far away schools or private schools. Riverstone is the only high school and again it is full off

commission house kids.

4. Present train frequency is so less and no fast trains available. With new apartments it is hard to imagine the travel .

5. The house prices will drastically reduce as no one wants to live near social housing due to the dangers associated with it. The peaceful environment the Schofields have presently will be totally lost.

6. The infrastructure in Schofields is not at all suitable to accommodate the proposed population. It will be a disaster to the government financially.

7. A suburb should be developed for positive future for next generation but not drag it down and when it is in developing stage. Schofields is the highest tax paying suburb in NSW as most of them are IT job holders who work hard and pay taxes sincerely.

Do good for them and cancel the proposal of the apartments

Objected too with these reasons

NSW transport do not have enough trains or buses to cater for huge population growth. Limited retail provision available. You need to consider Stockland is waiting to know regarding Metro and they plan to also put up buildings in and around Schofields station. Schools are limited to cope with population- Blacktown only hospital available - Rouse hill hospital has been promised for years but no progress so far. Build the infrastructure first and then re-zone the area- don't go reverse for population to suffer - not a right planning strategy.

I would like to object the submission due to lack of infrastructure within the area. By putting more dwellings it will only increase the stress on transport systems already saturated. I would like government to confirm completion of new reload connection such as opening of Aerodrome Drive to Quakers hill and opening of Meadow road connection prior to allowing further high density development. Please note that proposed rezoning areas are directly impacted by above mentioned road development.

I object to it

Submission

To add to list in my reason to object: 1) There no proper infrastructure planned for Schofields. Where is the Town center? Where is the high school? Why are you adding more traffic and population in already over crowded Schofields.

2) too much overload on load primary school, which is already having no capacity.

3) there is not even a high school in schofields and this development will even overload existing riverstone high school.

4) why cannot dept of planning rezone this land be used for High school instead.

Ex reasons to object

Traffic near schofields Rd and railway Terrace cross roads is not properly planned or too congested.

5) there is no sports facilities in and around the area. Why not use this land to build some parks for the kids.

NSW transport do not have enough trains or buses to cater for huge population growth.

Limited retail provision available. You need to consider Stockland is waiting to know regarding Metro and they plan to also put up buildings in and around Schofields station. Schools are limited to cope with population- Blacktown only hospital available - Rouse hill hospital has been promised for years but no progress so far. Build the infrastructure first and then re-zone the area- don't go reverse for population to suffer - not a right planning strategy.

There is no proper planning of roads, poor infra structures for schools such as high schools, retail stores and transportation and hospitals.

Over crowding the area cause lot of issues , reaching Tallawong is a nightmare NSW transport buses available only for an half an hour and buses are fully crowded and so is with schofields railway stations and no recreational facility centres and these should be first focused rather than building more units in this area

Submission

I object to the proposal as Schofields is having high traffic's issues already and without resolving these issues building more houses and bringing more people into community is not ideal.

NSW transport does not have enough trains or buses to cater for huge population growth. Schools are limited to cope with population- Blacktown only hospital available - Rouse hill hospital has been promised for years but no progress so far. Build the infrastructure first and then re-zone the area- don't go reverse for population to suffer - not a right planning strategy.

SCHOFIELDS, 2762, NSW

Please provide your view on the project

I object to it

Submission

I Object the proposal for the following reasons:

1. Public transport doesn't have enough trains and buses to cater for huge population growth. This will put pressure on the already choking road and car park network in and around Schofields.
2. Limited retail provision available. Need to increase the number of retail shops available in close proximity rather than depending on Rouse Hill town center or Westpoint Blacktown Shopping center.
3. Local schools are already at limit or over occupied to cope with rapid population growth.

4. Don't even have local highschool yet.

5. No public hospital close by. We have to depend on Mt. Druitt or Blacktown hospital.
Pleas focus on building the rouse hill hospital first.

6. You should focus on creating the necessary infrastructure first before rezoning land parcels for high density housing.

This will create a lot of congestion to already deprived suburbs with not enough parks and open land. Also this will impact the future of the kids with vastly different socioeconomic status and backgrounds. Before proposing something like this, the place needs to have better infrastructure and facilities not just housing blocks where the council can just make money and not do anything

I am living in Schofields for 6+ years now. In this period it has gone through significant population growth with lot of land release.

Unfortunately there is no infrastructure development like roads, public transport, parking around train station and shops to support the growth.

Example is Akuna Vista estate which has reached to the boundary of Quakers Hill but they have only one access road via Schofields.

It is ok to plan big apartment block near station but that needs to be done only after building essential infrastructure to mitigate significant impact to already congested roads and public transport.

We already have major issues in terms of traffic and parking. Basic infrastructure like parks for kids to play, community halls, open spaces, walking spaces, etc are not available. Now you want to add more people in the mix. Can you please build the minimal things required for families to live in before adding more houses to the area. People are already angry with the council for abysmal effort they have put into planning for Schofields. Other than selling land for housing there seems to be no other growth in this suburb. We don't even have a high school in the suburb. The schools are brimming with students with a terrible student to teacher ratio and now you want to add more housing? Get the basic amenities in place for the current residents.

I strongly object to this proposal and vote against it. NSW transport do not have enough road capacity, trains or buses to cater for huge population growth. There are already around 3000 units in Schofields and adding 1800 more will make mobility our worst nightmare. Limited parking provision means that roads will forever be congested. You need to consider Stockland is waiting to know regarding Metro and they plan to also put up buildings in and around Schofields station. Schools are limited to cope with this population growth. Blacktown only hospital available - Rouse hill hospital has been promised for years but no progress so far. Build the infrastructure first and then re-zone the area- don't go reverse for population to suffer - not a right planning strategy, but a dumping approach.

Please provide your view on the project

I object to it

Submission

I Object with these reasons

The traffic is too congested near schofields Rd and railway Terrace cross roads and as soon as we pass to railway way station two signals which takes nearly 25 minutes to pass all these signals.

NSW transport do not have enough trains or buses to cater for huge population growth. Limited retail provision available. You need to consider Stockland is waiting to know regarding Metro and they plan to also put up buildings in and around Schofields station. Schools are limited to cope with population- Blacktown only hospital available - Rouse hill hospital has been promised for years but no progress so far. Build the infrastructure first and then re-zone the area- don't go reverse for population to suffer - not a right planning strategy.

I agree to the above statement

Yes

Area is already over crowded, there is too much traffic and another 1800 units will make area almost inhabitable. Build school/shops/hospital/library/bigger roads and then think about having more units for social or affordable living. First give facilities to the community who has made this suburb home for last 10 years. Build affordable housing near city or in northern suburbs where house per sqm ratio is way less then western suburb.

Hi,

I am not in favour of this development. The Railway Terrace is very busy during peak hours. With these development the traffic with surge significantly. This would cause delay for office going people. Also, the number of accidents will significantly rise. This will risk the life of the people and school going children. The safety of the people should be first priority then having more houses.

Will lead to overcrowding and add immense strain on already lacking infrastructure.

You need to add infrastructure BEFORE adding more users of said infra.

Any rezoning should happen after metro station, multi level carpark and hospital is built to support the area.

Move this project further out, closer to Richmond where the population is lesser.

The infrastructure around the area does not support such a large scale development. This increased population will put a lot of pressure to existing facilities in the area.

Like very limited no. Of long day cares in the area. Waiting is almost 2 years. There are currently Parking issues around station.

We moved to the based on the planning proposals at the time but now its going to be a busy suburb. It will loose as its appeal as a calm area.

Social housing will bring crime to the area.

The growth to the Schofields and surrounding areas has been quite substantial over the last couple of years.

There aren't enough amenities and facilities to support the existing population and more multi-storey housing will put extreme stress to already stretched infrastructure.

The neighbourhood consists mainly of young families having lack of basic facilities like childcare, medical centres and hospital and shopping centres. There is no High school catered to this region.. There is too much pressure on current high school. Schofields parking is always at capacity, rather overflowing with people parking in altrove area.

There has to be a balance between housing and commercial in any area. There has been continuous increased housing in Schofields and surrounding suburbs, including various

apartment currently under construction, with no plans to grow amenities to support the people moving to this area.

There is a need to build basic infrastructure first before planning any further multi storey housing in Schofields.

I object to it

Submission

I strongly oppose to the proposed housing commission in our area. While I understand the need for affordable housing and support initiatives that aim to address this pressing issue, I believe that the location chosen for this commission is not suitable and may have detrimental effects on our community.

Impact on property values, safety concerns to young families.

Furthermore, I am concerned about the lack of community input and transparency in the decision-making process leading to the selection of this site. It is imperative that residents

have a voice in matters that directly affect their neighbourhoods and livelihoods.

I urge the Council Building Housing Commission to reconsider the location of the proposed housing commission and engage in meaningful dialogue with the community to identify alternative sites that better serve the needs of both residents and those in need of affordable housing.

Schofields community has already grown tremendously and due to this, there is a shortage of parking spots, has increased the frequency of traffic jams and has created crowded parks and shopping complexes. Therefore, an additional massive number of units will not benefit overall for the Schofields community but instead will create unnecessary bigger inconveniences. Hence, I object to this proposal.

1. Railway terraces is already crowded with many apartments and blocks the entire traffic to and from the station. A new high density block like this will only increase the traffic there.
2. High schools has not started yet for Schofields and Tallawong. We should look at that infrastructure before building new ones.
3. The are no street lights near sidingterraces exist from the station and with social Housing it will increase the security risk for people using that exit.

What kind of infrastructure you are going to provide for new development. Schofield rd is already choked during peak hours. Tallawong and schofield station parking is not enough to accomodate schofields and tallawong population itself. However people from near by suburbs also use this parking. Ideally you guys should think about parking and road infrastructure first after that new development of units or houses. Even i have not raised concern about green area and park for kids yet. Please think twice before taking any steps.

Existing infrastructure is not sufficient to cater to existing population with lack of sufficient open spaces around high existing high density housing. Nor are there sufficient child care centers, high schools or community facilities for the growing population of the suburb. Schofields is also one of the top preferable suburb for first home buyers and young families which mean most of these families have young kids that would required sufficient education and community facilities to thrive which is lacking even for existing population.

The new proposed high density developments would exacerbate demand for these already scarce resources. Any new development in this suburb should only be approved upon condition to substantially improve the community facilities and associated infrastructure. This should also include increase in public transport options to the city for working class population.

We moved in this area in 2019 (we have new baby in July) with a hope to have our child in daycare and we struggled to get enrolment as it was always full and long waiting. Not many day care center hardly any parks for kids and not enough infrastructure. First build the infrastructure then bring the housing else I do object this and I do not wish more house in this area when there is no facility.

My kids already now in school but what is the point when you spend million dollar for a house but you still struggle to get any infrastructure in the area.

The current infrastructure is insufficient to sustain the proposed development plans. The area already lacks essential amenities such as high schools, hospitals, public transport, and parking areas. Implementing the proposed plan would further strain resources and negatively impact the quality of life for residents. Prioritizing the construction of necessary infrastructure is paramount before considering any changes to residential density, ensuring that the community's needs are adequately met.

I'd like to object to this project. The housing will be developed on flood zone which is not good planning and the community will be highly impacted during heavy rains. Moreover, I believe with the new houses already being built in the Riverstone/Schofields area, the suburbs are on the verge of saturation as we see from daily traffic and crowds at the public spaces. So please reconsider this project with consideration given to the environmental and community impacts, population overshoot and pressure on the infrastructure. Thanks.

I object high density dwellings as Schofields does not have good infra capacity like roads etc to accomodate more traffic and public activities

There aren't enough schools, parking spaces and train frequency at peak hours is already at capacity as employees are asked to start going back to offices for work.

This will make situation even miserable and bring down the value of Schofields as well as north west in general

Again, affordable housing will likely add to vulnerable activities that would add to trouble impacting peace and harmony in communities around. Already we are facing growing cases of car and homes break ins and there's only one police station at riverstone to support, which certainly is not helping address these issues

Last but important, more saturated communities will come at cost of open green spaces

which are must for long sustainability of healthy environments around in Schofields

Urge and request to kindly consider above concerns before making any immediate decisions

Thanks,

Jay Chhaya

Currently Quakers Hill being a very old suburb, hasnt got developed on par with other suburbs of the Sydney and with this new sudden influx of 10000 individuals, this is going to put this suburb atleast 5 to 10 yrs backward especially when there is a social issue with a high concentration of people with economically disadvantaged.

Perhaps, currently is is highly recommended that government build schools, hospitals and playgrounds instead. Or at the least look for an upgrade the existing station. Even the public transport is very poor and my kids are struggling to commute to schools. With these influx of new people coming is going to put more pressure on this suburb. Kindly request you to reconsider this decision of accommodate for the influx of people moving in, especially if 33 percent of that gouta is allocated to social housing.

(1) This proposal adds 1,751 new dwellings and is expected to add nearly 3,000 people. Building height will be 32m.

(2) This proposal contains 165 studio apartments which do not have their own parking slots at all. However, the occupants will have vehicles which will be parked on roads.. This will lead to congestion on roads

(3) Data used in social impact assessment is from 2021 census. Profile of local area (800 metre radius from site) has changed significantly by January 2024. Social infrastructure will be under more stress.

(4) Current zoning allows for around 900 dwellings with building height of 16m. Proposal is to raise height to 32m and raise number of dwellings to 1,751. Instead of that, the existing zoning of 900 dwellings and 16m height should be continued

This area is already overdeveloped. Local resources, parks, libraries, roads can barely sustain the current population. Please stop overdevelopment in north west Sydney. There are already countless apartment buildings being built all around this area with no plan of improving infrastructure. Why is there a disproportionate number of apartment development in north west Sydney compared to wealthier areas in north Sydney, norther beaches etc? This is discrimination

There is already insufficient infrastructure in this area, increasing housing will cause further strain.

I am concerned of the social implications of housing near my area, safety of my family is my greatest priority.

The proposed housing will also negatively impact surrounding property values. In the current market and interest rate environment this is extremely unfair.

- 1) Limited availability of allocated parking spaces.
- 2) Increased volume of traffic congestion --> will lead to increase in road noise
- 3) Ratio of public housing in the street will overwhelm the number of private residences.
- 4) House prices will fall, private property owners are left with an unfair disadvantage in the real estate market.
- 5) Blocks of housing commission are out of character.

As a concerned resident of Schofields, I vehemently oppose the proposed new development for several significant reasons:

1. ****Infrastructure Neglect:**** Schofields has experienced a surge in population without commensurate improvements in essential infrastructure and facilities. Our primary schools are overflowing, and the absence of a public high school only exacerbates the strain on our educational system.
2. ****Traffic Gridlock:**** The current traffic congestion around Railway Terrace is intolerable, spilling over onto neighboring roads. Introducing an additional 1800 units, including social housing, will undoubtedly worsen this situation, making Schofields less desirable to live in and adversely affecting property values.

3. **Safety Concerns:** The sudden influx of residents, especially with the inclusion of social housing units, raises legitimate concerns about increased crime rates in our community. This is a significant worry for the safety and well-being of current residents.

Rather than proceeding with this misguided development plan, I propose that the land be repurposed to address the urgent needs of existing residents. Specifically:

- **Expanded Community Services:** We urgently need more shopping and entertainment options to cater to the growing needs of our population.
- **Enhanced Family Support:** Additional childcare facilities are essential to support working families in our area.
- **Improved Healthcare Access:** Access to health and general practitioner clinics must be expanded to adequately serve our community's healthcare needs.
- **Enhanced Recreational Opportunities:** More playgrounds and sporting facilities are essential for the health and enjoyment of Schofields residents.

Furthermore, it's essential to question the unequal distribution of social and affordable housing, which appears disproportionately targeted at western suburbs like Schofields. Why aren't similar developments planned for Northern and Eastern Suburbs? It's clear that certain areas are being unfairly burdened while others are being preserved as exclusive enclaves.

In summary, the proposed development not only fails to address the urgent needs of existing residents but also risks exacerbating critical issues such as infrastructure strain, traffic congestion, and crime rates. It's time for decision-makers to prioritize the well-being and interests of Schofields residents over short-term development agendas.

Submission

As a resident of Schofields, I strongly oppose the proposed new development for several compelling reasons:

Infrastructure Strain: Schofields has experienced a significant surge in population, yet essential infrastructure and facilities have failed to keep pace. Our primary schools are overwhelmed with overcrowding, and the absence of a public high school further compounds the educational strain on our community.

Traffic Congestion: The existing traffic congestion around Railway Terrace has become unbearable, with overflow onto interconnected roads exacerbating the problem. Introducing an additional 1800 units, including social housing, will undoubtedly exacerbate this issue, making the area less livable and negatively impacting property valuations.

Crime Concerns: A sudden influx of residents, particularly with the inclusion of social housing units, raises valid concerns about increased crime rates in our neighborhood. This is a significant worry for the safety and security of current residents.

Instead of proceeding with this ill-conceived development, I propose that the land be repurposed to address the pressing needs of existing residents. Specifically:

Expanded Amenities: We urgently require more shopping and entertainment centers to cater to our growing population's needs.

Enhanced Childcare Facilities: Additional childcare centers are essential to support working families in Schofields.

Increased Healthcare Services: Access to health and general practitioner clinics must be improved to meet the healthcare needs of our community.

Enhanced Recreational Facilities: The creation of more playgrounds and sporting facilities is vital for the well-being and recreation of Schofields residents.

Furthermore, it's important to question the unequal distribution of social and affordable housing, which seems disproportionately targeted at western suburbs like Schofields. Why aren't similar developments planned for Northern and Eastern Suburbs? It's evident that certain areas are being preserved as exclusive enclaves while others are being burdened with the label of "urban slums."

In summary, the proposed development not only fails to address the pressing needs of existing residents but also risks exacerbating already critical issues such as infrastructure strain, traffic congestion, and crime rates. It's time for decision-makers to prioritize the well-being and interests of Schofields residents over short-sighted development agendas.

The plan to squeeze 1,600 to 1,800 dwellings into a 6.3-hectare site is impractical and unsustainable. It will strain infrastructure, harm the environment, and disrupt the community. The rushed public exhibition period lacks adequate time for meaningful input. We urge the Department to reconsider and prioritize a more balanced, sustainable approach to development..
